PhD candidate in 3D computer vision, multimodal LLMs (VLMs), and generative models. First author at **ECCV 2026** and **NeurIPS 2026**; interested in language-driven 3D understanding and VLM post-training.

Available for research internships: Summer/Fall 2027.

Education

- **Ph.D. Candidate, Computer Science**, TU Hamburg & Helmholtz-Zentrum Hereon *Jan 2025 – expected Dec 2027*
  Advisors: Roland Aydin (DFKI) and Robert West (EPFL).
- **M.Sc. Computational Science & Engineering**, Technical University of Munich *Oct 2021 – June 2024*
  Grade **1.5** (German scale; 1.0 = best); focus in Machine Learning and Simulation Sciences; Deutschland Stipendium.
- **B.Eng. Mechanical Engineering**, BITS Pilani, Hyderabad *July 2015 – May 2019*
  Grade **9.63/10**; Merit Scholarship (top 2% academic performers).

Experience

- **Doctoral Researcher**, Helmholtz-Zentrum Hereon, Hamburg *Jan 2025 – Present*
  - **Language-driven 3D grounding:** prompt-conditioned **view selection** over a **VLM** reasoning-segmentation backbone to localize CAD faces and edges on meshes; up to **1.7**× face IoU and **4.5**× edge F1 over CLIP-based baselines [1].
  - **Zero-shot physical reasoning of MLLMs: multimodal LLMs** localize stress-critical regions for **FEM mesh refinement**; without any FEM solve, closes **58%** of the gap to a reference-solve oracle [2].
  - **Active view selection under occlusion:** view-selection policy and CadQuery-generating **VLM** jointly trained with **RL on execution rewards**; **+21/+17** effective-mIoU over best baselines, ≤1.5% invalid code; **mechanistic** view-token ablations [3].
  - **Point2BIM** (ongoing, with DFKI): real laser scans → executable **BIM programs** via VLMs; **SFT + GRPO** with execution rewards; multi-GPU training (4×H200), **vLLM** inference.
  - Co-author on LLM agents for scientific modeling [6, 7] and pretraining-time LLM alignment [4].
- **AI Engineer**, Project-S and Beyond Technologies, Munich: ML for **radar perception** *Sept 2024 – Dec 2024*
- **Master Thesis Intern**, BMW AG, Munich *Sept 2023 – May 2024*
  - Accelerated design of 2D/3D flow geometries by **2**× using **Physics-Guided Diffusion Models** and **GANs**, integrated with an autograd-based 3D topology optimization tool. Grade **1.0**.
- **Machine Learning Werkstudent**, TUM Graphics & Visualization (Thuerey group) *May 2022 – Aug 2023*
  - Implemented **Graph Neural Networks** and **Convolutional ResNets** for chaotic PDEs; built CI/CD and tests for PhiFlow; co-authored the resulting paper [5].
- **Software Engineer**, L&T Construction, Pune: data-pipeline automation (Praise Award) *July 2019 – Sept 2021*

Skills

- **ML/AI:** Vision-Language Models, Multimodal LLMs, Agentic VLMs, LLM Fine-tuning (LoRA), RL Post-training (GRPO/RLHF), Capability Evaluation of Foundation Models, Diffusion Models, GANs, VAEs, GNNs
- **Computer Vision:** 3D Scene Understanding, Point Clouds, 3D Reconstruction, Multi-View Geometry, Referring/Reasoning Segmentation, Semantic Segmentation (U-Net, PointNet), Meshes, SDFs
- **ML Systems & Deployment:** PyTorch (FSDP/DDP), HuggingFace (Transformers, PEFT), vLLM, FlashAttention-2, network pruning, Docker, Slurm, W&B, TensorBoard
- **Tools:** Python, C++, CUDA/Triton, JAX, OpenCV, CadQuery, BlenderProc, PyVista, Git, VS Code, Linux
- **Domain:** Scientific ML, Differentiable Simulation, PDEs, Physics-guided Generative Design
- **Languages:** English (C1), German (B1)
